REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 2 are allowed, as the prior art of record does not teach or suggest a method of reducing artifacts in steady state free precession signals for use in magnetic resonance imaging, including the steps of weighting the image data to emphasize higher magnitude signals, in combination with the remaining limitations of the claims.

Claims 3 and 4 are allowed, as the prior art of record does not teach or suggest a method of reducing artifacts in steady state free precession signals for use in magnetic resonance imaging, including the steps of weighing by squaring the image data for each sequence to emphasize higher signal, in combination with the remaining limitations of the claims.

Claims 5 is allowed, as the prior art of record does not teach or suggest a method of reducing artifacts in steady state free precession signals for use in magnetic resonance imaging, including the steps of weighing the image data to emphasize higher signals based on a computed off-response profile using a magnetic field map for the imaged object, in combination with the remaining limitations of the claims.

Claims 6-10 are allowed, as the prior art of record does not teach or suggest a method of reducing artifacts in steady state free precession signals for use in magnetic resonance imaging comprising the steps of

Claims 11-13 are allowed, as the prior art of record does not teach or suggest a method of reducing artifacts in steady state free precession signals for use in magnetic resonance imaging comprising the steps of weighing the image data to emphasize higher signals, in combination with the remaining limitations of the claims.
